

Welcome to BCASCD

We are the British Columbia affiliate of the Association for Supervision and Curriculum Development (ASCD).

Visit at ASCD.org

Who We Are . . .

BCASCD is recognized throughout the province of British Columbia for its commitment to excellence in offering professional development activities which positively impact student success in the classroom. Always mindful of regional diversity, BCASCD serves its constituents in all parts of the province by networking through workshops, newsletters and its website. We maintain our focus on classroom instruction that works and have a reputation as the provincial leader in influencing effective classroom practice.

Our Mission . . .

The Mission of British Columbia ASCD (BCASCD), is to identify and promote quality educational practices for all learners through leadership, development, and promotion of exemplary practices in curriculum, supervision, and instruction. Learn more at www.bcascd.org.

ALAN NOVEMBER

THURSDAY, OCTOBER 19, 2006

8:30 am - 2:30 pm

SHERATON GUILDFORD HOTEL

15629 104th Avenue - Surrey, BC

Presented by BCASCD

About the session:

A powerful new culture of empowered teaching and fearless learning is emerging. Access to more timely information and communication tools can empower educators to focus on the individual learning needs of their students. These same tools can lead to more collegiality, build stronger community relationships, and empower students to be more self-directed. This workshop presents clear examples of how this new culture has been achieved.

We now have tools to build and strengthen our learning communities. We have the opportunity to provide our students with authentic assessment relationships over the web that can help dramatically improve student motivation. We can take advantage of the communication tools the Internet provides, such as blogs, Instant Messenger, video conference or email. Research suggests many students are more willing to ask for help and accept criticism when they are online.

About Alan November:

Alan November is recognized internationally as a leader in education technology. He began his career as an oceanography teacher and dorm counselor at an island reform school for boys in Boston Harbor. He has been a director of an alternative high school, computer coordinator, technology consultant, and university lecturer. Alan has guided schools, government organizations and industry leaders as they plan to improve quality with technology.

Alan was named one of the nation's fifteen most influential thinkers of the decade by Classroom Computer Learning Magazine. His writing includes dozens of articles and the best-selling book, *Empowering Students with Technology*. Alan was co-founder of the Stanford Institute for Educational Leadership Through Technology and is most proud of being selected as one of the original five national Christa McAuliffe Educators.

Some of Alan November's key concepts:

- *The real revolution is not about technology. It's about access to information and communication. It's not about the wires, it's about what flows through them.*
- *The Internet can provide any version of the truth to support almost any belief. We need to teach students how to read the "grammar" of the Internet and apply strategies to validate information on websites.*
- *Access to more timely information and communication tools can empower educators to focus on individual learning needs of their students.*
- *We have the opportunity to provide our students with authentic assessment relationships over the web that can help dramatically improve student motivation.*
- *The reality of the networked global economy is that any desk job can be moved anywhere in the world within seconds. Our students must learn global survival skills of competing and cooperating with people around the world.*
- *Articulating vision and mission, managing change, and aligning technology to primary goals are key skills for school leaders.*
